

# Job Safety Analysis

A JSA, although written, is not JUST a paper work exercise.

- It is a tool to help:
  - ▣ Identify ALL risks and hazards
  - ▣ Plan to mitigate hazards
  - ▣ Develop a process to ensure work is executed safely
- Remember:
  - ▣ **Start with the first column.** List the steps of the job in order from set up to take down.
  - ▣ Then list the potential hazards of each step in the second column.
  - ▣ Then move on to the third column and list the safety controls.
  - ▣ If scope or environment changes, the JSA must be revised.

**CONDITION OF USE: THIS FORM IS APPLICABLE FOR ALL RETAIL MAINTENANCE WORK EXCEPT FOR THE FOLLOWING SITUATIONS:**

- More than 4 workers at one time, or
- Work expected to require more than 2 days to complete, or
- Work within a fenced area, or
- High Risk Work (demolition, excavation greater than 0.5m, confined space entry except STP sumps, open flame in hazardous area, erection of structures).

JOB SAFETY ANALYSIS (JSA)		
Hazardous Activity	Potential Hazards	Safety Controls to Reduce or Eliminate Hazard
<i>(Order in which the work will be carried out and brief details of how tasks will be performed)</i>	<i>(Examples: electric shock, fall, fire, cut, vehicle impact, chemical splash, asphyxiation, critical control bypassed, etc.)</i>	<i>(Describe the precautions that will be taken)</i>
